Abstract

Since the popularization of generative artificial intelligence, teachers, students, and parents within the educational community have displayed a diverse range of responses. Does AI induce anxiety or does it empower us as individuals? As frontline educators, should we resist AI or should we master it to the extent of "transcending" it? In this workshop, Ms. Amy Yang will use the design of the written curriculum and the taught curriculum in actual IB teaching as examples to discuss how AI can be integrated with the IB's concept-based curriculum design and its core pedagogical principle of "inclusive learning," thereby empowering the cultivation of qualified "communicators" well-equipped for the future. Join us to discover how AI can be not just a tool, but a transformative force in the realm of education.

Guest Speaker

Ms. Amy Yang (杨华) currently serves as the MYP & DP Chinese Teacher at ESF Discovery College. She is a certified trainer for Lynn Erickson's concept-based curriculum and instruction methods, an IB Mandarin B examiner, and an IBEN workshop leader. With over ten years of experience as the Head of Chinese and a Professional Development Coordinator at an international school in Shanghai, Ms. Yang has been deeply involved in multiple rounds of Chinese curriculum review and implementation. As an accredited member of the Council of International Schools (CIS), Ms. Yang has participated in the accreditation process for five different international schools, both in China and abroad, amassing a wealth of diverse case studies and practical experience in curriculum and instruction.
