Abstract:

In IB education, there is a strong emphasis on Approaches to Learning (ATL), with a particular focus on the training of Thinking Skills. How can we integrate Chinese teaching with thinking skills training to simultaneously enhance students' Chinese abilities and their thinking skills? Moreover, how can we better prepare students for IBDP learning when they are in lower secondary school? This talk aims to share teaching methods for Secondary Chinese teachers, drawing from the perspectives of metacognition, thinking routines, and drama pedagogy.
